

## Roster

Denise Julia

Tell me how you like it, baby?  
Tell me would you like it more  
If I show you how I do it  
How I did it like before?  
I've been finding peace of mind  
Then you came and I relapsed  
Been a long time since I saw you last

So I'm speaking from player to player  
You and I can't play  
All the moves you make, I used to do the same  
Don't add me to your roster, baby  
'Cause I'ma beat your game  
All the words you say, boy, I used to say the same

But should you stay  
We could go down or we could do this my way  
I don't wanna be that girl who gets replaced  
It depends on how you choose to behave  
Sick of playing games

But should you stay, stay, stay  
But should you stay, stay, stay  
But should you stay, stay, stay  
But should you stay, stay, stay

Player to player, you get me like  
Who are you playing? But I just might  
Go along with you  
Show me a thing or two, I don't mind  
Oh, give me what I need you better boy  
Don't tell me you'll keep it on the low  
You know that I'm good and I'm pretty like that  
Really don't deserve me but I want you like that  
Should've never let my guard down like that  
But it hurts so good when your loving's so bad  
You were on a mission while I was still wishing  
That you could've treated me right, you were out kissing  
High on attention from other girls left me behind

So I'm speaking from player to player  
You and I can't play  
All the moves you make I used to do the same  
Don't add me to your roster, baby  
'Cause I'ma beat your game  
All the words you say, boy, I used to say the same

But should you stay  
We could go down or we could do this my way  
I don't wanna be that girl who gets replaced  
It depends on how you choose to behave  
Sick of playing games

But should you stay, stay, stay  
But should you stay, stay, stay  
But should you stay, stay, stay  
But should you stay, stay, stay
