

Along The Way

DENM

Cheers to memories that we made
And all the love along the way
I still wish that you could stay
But I'll see you again someday
Cheers to memories that we made
And all the love along the way
I still wish that you could stay
But I'll see you again someday, someday

From the womb to the tomb til the wheels fall off
It was me it was you up against all odds
You were here now you're gone and I'm feeling lost
How we love then we lose its kinda messed up
Getting used to this life without you
Something I never wanted to do
But someday's in mysterious ways
You stop by for few, just passing through

Cheers to memories that we made
And all the love along the way
I still wish that you could stay
But I'll see you again someday
Cheers to memories that we made
And all the love along the way
I still wish that you could stay
But I'll see you again someday, someday

Gone but not forgotten
Ashes on the coffin
We all gon face this problem someday
The time that we got
Tomorrow is not promised
This is the monster we face
Life's just an adventure
One thing you must remember
Nothing says the same
Except for the love
Except for the love and pain

Cheers to memories that we made
And all the love along the way
I still wish that you could stay
But I'll see you again someday
Cheers to memories that we made
And all the love along the way
I still wish that you could stay
But I'll see you again someday, someday
Someday, someday
