

Blow It Up

DENM

Blow it up, blow it up
Blow it up, blow it up, go

Another day another drag
Sometimes it gets so bad
Chillin' depressed at the pack
Man, I'm so broke, it's sad

Hit the crew, they gon' probably go through
If it's a vibe then we'll turn the function up out on the roof
What we gonna do when this song gets low?
And the streetlights glow? We already know

Nobody cook one low when you roll with us
You pour in that smoke, then you blow it up
Blow it up

We're like a time bomb
No telling when we'll blow
Like a bullet in a gun
You better pray we don't go (Yeah)

Hit the crew, they gon' probably go through
If it's a vibe then we'll turn the function up out on the roof
What we gonna do when this song gets low?
And the streetlights glow? We already know

Nobody cook one low when you roll with us
You pour in that smoke then you blow it up
Blow it up
Nobody cook one low when you roll with us
You pour in that smoke then you blow it up
Blow it up

Nobody cook one low when you roll with us
You pour in that smoke then you blow it up
Blow it up
Nobody cook one low when you roll with us
You pour in that smoke then you blow it up
Blow it up
