

# Land of the Living

Dennis DeYoung

It's good to be back in the land of the living  
Good to be back  
Good to be back in the land of the living  
Good to be back

There's a seismic shift  
A powerful lift  
In the atmosphere  
And the whole world rocks  
Feeling after shocks  
Whenever you're near

I wasn't living just existing  
Till the moment I saw your face  
Then the strongest of all emotions  
Hit me by surprise right between the eyes  
Resurrecting and I realize

You're taking me back  
To the land of the living  
You're taking me back  
You're taking me back  
To the land of the living  
You're taking me back  
Taking me back, taking me back  
Well baby you're loving me back to life

Up on higher ground  
From the lost and found  
You rescued me  
And restored my faith  
In all of the things  
That I could be

In a galaxy filled with planets  
In a world of mystery  
When you looked in my direction  
From Venus to Mars we counted the stars  
And little by little, true love was ours

You're taking me back  
To the land of the living  
You're taking me back  
You're taking me back  
To the land of the living  
You're taking me back  
Taking me back, taking me back  
Well baby, you're loving me back to life

Girl I'm here to say we're no every day miracle  
We're taking each other on an endless ride  
Moonstruck lovers burnin' into the night

It's good to be back in the land of the living  
Good to be back  
It's good to be back in the land of the living  
Good to be back

You're taking me back  
To the land of the living  
You're taking me back  
You're taking me back  
To the land of the living  
You're taking me back

You're taking me back  
To the land of the living  
You're taking me back  
You're taking me back  
To the land of the living  
You're taking me back

You're taking me back  
To the land of the living  
You're taking me back  
You're taking me back  
To the land of the living  
You're taking me back
