

Across the Multiverse

Dent May

How did you find me here waiting for ya?
Across the multiverse we collide
It's extraterrestrial, our love
Across the multiverse, you and I

Light years away from your planet
Out here alone I was stranded
Beyond space and time
Your cosmic devotion materialized

I'm falling hard into your orbit
Babe, it's too strong to ignore it
Something's pulling me
I can feel you're worth the odyssey

How did you find me here waiting for ya?
Across the multiverse we collide
It's extraterrestrial, our love
Across the multiverse, you and I

I can't talk myself out of this
I just want some closeness
Never wanna leave
I love you though you're so far out to me

Lost in another dimension
How did I grab your attention
Through an empty void?
You crashed into me like an asteroid

How did you find me here waiting for ya?
Across a multiverse we collide
It's extraterrestrial, our love
Across the multiverse, you and I

How did you find me here waiting for ya?
Across the multiverse we collide
It's extraterrestrial, our love
Across the multiverse, you and I
