

Full Speed Ahead

Dent May

I tried my best
And once again I failed the test
I lost my head
I could not help but be upset
I have regrets
My heart will not let me forget

Full speed ahead now
No more looking back

Waiting for the night
To come along
We wandered far and wide
To find a place where we belong
Here in this twisted world
You have a friend
And you can be sure
We'll have a chance to start again now

Full speed ahead now
No more looking back

I hold my breath til I turn red
I need some air
I reach my hand out for a friend
And no one's there
I play back over and over again
The words I said

Full speed ahead now
No more looking back

Waiting for the night
To come along
We wandered far and wide
To find a place where we belong
Here in this twisted world
You have a friend
And you can be sure
We'll have a chance to start again now

Full speed ahead now
No more looking back
Full speed ahead now
No more looking back

Full speed ahead now
No more looking back
Full speed ahead now
No more looking back
Full speed ahead now
No more looking back
Full speed ahead now
No more looking back

Every day
I pinch myself to feel that I'm not dreaming

Anymore
