

# Help Me

Deorro

Been feeling like a long life, I'm shutting down  
No sun, no daylight, I'm sick of sound  
My head ain't alright, I'm checking out  
I'm staying offline, Velvet on the ground

I need to switch up the station  
I think I've forgotten to heal  
My heart is becoming so vacant  
And it's getting harder to deal  
I just need someone to

Help me, help me, help me  
I just need someone to  
Help me, help me, help me  
I just need someone to

Help me, help me, help me  
I just need someone to  
Help me, help me, help me

Caught in rotation  
I'm stuck unbound  
I need a little patience  
It's running out (It's running out)

I need to switch up the station  
I think I've forgotten to heal  
My heart is becoming so vacant  
And it's getting harder to deal  
I just need someone to

Help me, help me, help me  
I just need someone to  
Help me, help me, help me

Need someone with a lotta love  
Need someone with their hands-off  
When I fall, when I fall  
Need someone with a lotta love  
Need someone with their hands-off  
When I fall, when I fall  
I just need someone to

Help me, help me, help me  
I just need someone to  
Help me, help me, help me  
I just need someone to  
Help me, help me, help me  
I just need someone to  
Help me, help me, help me  
I just need someone to

I just need someone to help, help, help  
I just need someone to help, help, help
