

# Before We Drown

Depeche Mode

I've been thinking I can come back home  
So how would that be, you and I alone?

All alone?

I have a feeling, you're not on my side  
There's a distance, between you and I  
You and I

First we stand up, then we fall down  
We have to move forward, before we drown  
We drown

I feel so naked, standing on the shore  
Are you sure?  
Nothing's out there, nothing else no more  
No more?

First we stand up, then we fall down  
We have to move forward, before we drown  
We drown

We drown  
We drown  
We drown

First we stand up, then we fall down  
We have to move forward, before we drown
