

## First Light

## Deportees

Tell me about the time  
When you slipped and fell into this hole  
Tell me how it was  
Right before when all your dreams got lost

I know where it hurts  
There are things too dark and never hide  
Let me be your healer  
'Cause I can be the drug that you prefer

Honey you're [?]  
Honey you're a lightning  
Honey it's more than  
Wake up from your bad dream  
I know it's easy to forget when you're gutless  
It's not dark yet  
We got some love left

You claim that you know  
How they talk when you are not around  
Well I can say it all  
But people have no clue how dreams get lost  
I know all your fears  
Most of them look awfully a lot like mine  
I want us to be seventeen again  
I just want to see you smile like we did back then

Honey you're [?]  
Honey you're a lightning  
Honey it's more than  
Wake up from your bad dream  
I know it's easy to forget when you're gutless  
It's not dark yet  
We got some love left

There are things too [?]

Honey you're [?]  
Honey you're a lightning  
Honey it's more than  
Wake up from your bad dream  
I know it's easy to forget when you're gutless  
It's not dark yet  
We got some love left

We got some love left  
We got some love left  
We got some love left
