

Lost Future / All Future

Deportees

I got a heart but it's used babe
Though it's working like it should
While we're waiting for a bad time
We could do some good
And if you need some comfort
I can do that too
And if I need the same thing
I'll put the weight on you

I'm not looking for protection
I am not afraid
Everything is choices
That we never made
I don't know who told you
But I'm afraid it's true
We have lost a future
And we badly need a new

You want to love me with the lights out
I don't really mind
I've seen you in your worst state
I still love you blind
Time can feel so precious
When it is too late
I will hold your hand tight
When we gather at the gate

You want to love me with the lights out
I don't really mind
I've seen you in your worst state
I still love you blind
I don't know who told you
But I'm afraid it's true
We have lost a future
And we badly need a new

I'm wide awake
You are still sleeping
Swear you'll stay
And promise to keep it
I'm coming back to my wildest fear
You are still gone
And they are still here

I'm wide awake
You are still sleeping
Swear you'll stay
And promise to keep it
I used to worry about your every tear
The world was theirs
Now it is here

I'm wide awake
You are still sleeping
Swear you'll stay
And promise to keep it
I'm coming back to my wildest fear

You are still gone
And they are still here

I'm wide awake
You are still sleeping
Swear you'll stay
And promise to keep it
I used to worry about your every tear
The world was theirs
Now it is here
