

Missing You , Missing Me

Deportees

It's a free world
And you're a big girl
You will never learn
So you can dig your own grave without me

You and I were dancing
When the music stopped
I fell through the floor
But you stayed on top
Now I'll never make it back across this great divide
And I miss the old you like you miss the old me

You only see what you wanna see
You only hear what you wanna hear
Well you can do what you wanna do
But you'll miss the old me
Like I miss the old you

It's a free world
And you're a big girl
You will never learn
So you can dig your own grave without me

You don't have to listen to what I say
You don't have to do things my way
You can burn your bridges if you want to
And it's your own choice
To fall flat on your face

Is this what we became?
A dead painting in a frame
We turned into something we don't wanna be
Now I miss the old you
And you miss the old me

It's a free world
And you're a big girl
But now the tables turned
So you can dig your own grave without me

It's a free world
And you're a big girl
You will never learn
So you can dig your own grave without me

If I would be your kind of man
I wouldn't be the man I am
I can't be what I'm not
And I can't forgive
What you already forgot

It's a free world
And you're a big girl
But now the tables turned
So you can dig your own grave without me

It's a free world

And you're a big girl
You will never learn
So you can dig your own grave without me
