

# Time Is The Tiger

## Deportees

You're tired and you're quiet  
Still I know there's a riot in your head  
The lion that you married  
Oh the lion never married you back  
You're scared and you're frightened  
Oh the lights are so bright  
And so are you  
You live through the music  
I can tell because I used to

Saying we used information  
To stand by your decision  
And you almost feel religious  
As you're burning all the bridges

All the speed  
All the racing  
All the years that you wasted on them  
They say that there's a young you  
But the chains they put on you they won't hold  
So tonight  
You'll go dancing  
You'll take one of the chances you have left  
And you'll live through the music  
I can tell 'cause I used to

Saying we used information  
To stand by your decision  
And you almost feel religious  
As you're burning all the bridges

And it feels right  
So you choose it  
Oh you close your eyes  
And you lose it  
It's the sermon  
And a solace  
Oh it almost feels  
Like a promise

Saying we used information  
To stand by your decision  
And you almost feel religious  
As you're burning all the bridge

Saying we used information  
To stand by your decision  
And you almost feel religious  
As you're burning all the bridges
