When They Come

Deportees

When they come maybe they'll be dressed in white on white
Maybe they will bring such a brighter light
Or maybe they will let us down, aah

When they come maybe they will kiss all your pain away
Maybe they will make all your love stay
Or maybe they're just here for the rain

I've always wondered what I'd do in case they called my name
There's a thing I know of you, it's that you feel the same

Oh when they come maybe we can get things to work inside
We've got goals to build
Seasons gonna change and we overfill
In this modern age maybe we can get things to work inside
And when lightning strikes I am gonna feel alright

When they come maybe we'll be deaf by the strangest sound
Maybe we will run like a scattered crowd
Maybe we'll just feel alright

I've always wondered what I'd do in case they called my name
There's a thing I know of you, it's that you feel the same

Oh when they come maybe we can get things to work inside
We've got goals to build
Seasons gonna change and we overfill
In this modern age maybe we can get things to work inside
And when lightning strikes I am gonna feel alright
