

Black Typhoon

Derdian

Hey demons, what are you doing there
The dimensional gate is opening
Prepare to assault that fucking reign of Astar

We see a black abyss is piercing the sky
Like a dimensional gate
Something is telling me the time to fight will not wait
Troghlor's armada is riding the sky
Devastating our life
All these centuries burning on fire

Powerless we see the demon's approach
Just one defense: our shield
But what can this new technology do against the arcane
Cause no one expected they would come back home
All for the conquest of throne
Sons of Astar now destroy them all

You will crawl
As the worms
As the eternal night on Astar will fall
Let's go on
Precious horde
Never ending slaughter, we bring

As a huge black typhoon
We'll overwhelm you soon
Your memory will come back alive
In bitter tears you fall
You will regret to have been
So haughty to have prospered in this land

Shining the light behind the demons above
Not a good omen
Deploy the Starfleet, infantry out of the shield
At once

Troghlor master of the war
You will get the Astar's crown
Troghlor master of the war
You will get the Astar's crown

There's no time to waste now
The last time I approached your town
I enjoyed it

As a huge black typhoon
We'll overwhelm you soon
Your memory will come back alive
In bitter tears you fall
You will regret to have been
So haughty to have prospered in this land

As a huge black typhoon
We'll overwhelm you soon
Your memory will come back alive
In bitter tears you fall

You will regret to have been
So haughty to have prospered in this land
