

Fire From The Dust

Derdian

Many years we faced colonization
What about the human race
We remained few fighting against the aliens
Spending our lives for our fate
Dirty and hungry we resist in our caves
Showing the will of survive
Boundless honor we pose everyday on life

Hidden in shadows
Waiting for soldiers
Sent to the front
Difficult life
We've chosen from people
Month after month

And we don't know if
They will come back home
Will we see them one more time
Or we'll keep them in mind

They're killing
All we have become by now
And I can't believe
We can't stop fighting them all
We are going to take back our earth

Like a snake crawls out from the rocks
We go out from this fucking hole
Let the hate becomes a fire
Fire from the dust
Take the weapons, annihilate them
They are not machines
Like a snake crawls out from the rocks
Fire from the dust

Here's my friend who returns wounded and alone
"Where are the other guys?"
"I fought to the end but all their lasers
Exterminated, one by one"
And embracing him his wife cries:
"We have gained another day.
Please, god, let us survive"

They're killing
All we have become by now
And it's hard to believe
We can't stop fighting them all
We are going to take back our earth

Like a snake crawls out from the rocks
We go out from this fucking hole
Let the hate becomes a fire
Fire from the dust
Take the weapons, annihilate them
They are not machines
Like a snake crawls out from the rocks
Fire from the dust

There must be a way to kill them all
Not relying on technology
Extermination, extermination
Once we've been the masters of the war
An ancient page of our anthology
Extermination, extermination

Feel the fire within your veins
Show the power on all your faces
Fire from the dust of human race

Like a snake crawls out from the rocks
We go out from this fucking hole
Let the hate becomes a fire
Fire from the dust
Take the weapons, annihilate them
They are not machines
Like a snake crawls out from the rocks
Fire from the dust
