

# A Night Like This

Derek Ryan

The stars light up our own dance floor  
In your eyes I never need more  
Sweet slow airs move through the trees  
A summer song rolls on the breeze

On a night like this  
We could live forever  
With just one kiss  
We fit together  
Our beating hearts  
Fall like the stars  
Look at what we could've missed  
On a night like this

The camp fire sparks like a chandelier  
Into your arms I disappear  
May this dance go on and on  
May we never have to face the dawn

On a night like this  
We could live forever  
With just one kiss  
We fit together  
Our beating hearts  
Fall like the stars  
Look at what we could've missed  
On a night like this

Whoa oh oh, on a night like this  
Whoa oh oh, on a night like this  
Whoa oh oh, on a night like this

'Cause on a night like this  
We could live forever  
With just one kiss  
We fit together  
Our beating hearts  
Fall like the stars  
Look at what we could've missed

On a night like this  
We could live forever  
With just one kiss  
We fit together  
Our beating hearts  
Fall like the stars  
Look at what we could've missed  
On a night like this

Whoa oh oh, on a night like this  
Whoa oh oh, on a night like this  
Whoa oh oh, on a night like this  
On a night like this
