Derez De'Shon

Man, what is you askin' me... man, what?  
Man, you know better than that  
Homie, know who the fuck you talkin' to  
Nah bitch, you got me fucked up  
Where you at?

I thought I told you when we met that  
I got a girl, that's not my ex, yeah, yeah  
I kept it real and you said you respect that  
Now you actin' all different, callin' me, trippin'  
Thought I told you when we met that  
It's all fun and games until you get lost, bae  
I swear these hoes the same and I done had 'em all, bae  
I done had 'em all, from the hoodrats to the stars  
Had 'em lightskin, had 'em dark  
Thought I told you when we met

I'm a motherfuckin' player, what you thought? (What you thought?)  
Period, like that time of the month (Of the month)  
I do everything I want, I can pull up how I want  
Swag different, Saint Laurent  
Fat nigga drippin' hard (Drip)  
I know I had you from the start  
Had you in your heart  
Caught up in your feelings  
Thought you knew what's happenin' when I called  
Thought you knew what's happenin' when you let a nigga get it in the backseat of my car (Car)  
Thought we was cool  
But you been actin' new  
And the way you text, I know you in one of your moods  
You know I like that shit, when you mad, you so cute (What's happenin'?)  
I'm tryna fuck, what it do?

I thought I told you when we met that  
I got a girl, that's not my ex, yeah, yeah

'Cause you bought me Saint Laurent

Nigga how the fuck you tryna front?  
I don't let no anybody get up in it

Barely even let a nigga hit the blunt  
MVP, been ballin' on 'em, baby, I'm clutch  
You hit me up, I used to text back (I used to text right back)  
Said you can't wait until I get back (Was comin' right)  
I let you bore it into my head (That's the shit that I resent)  
Now you're callin' me different, talk but never listen

I thought I told you when we met that  
I got a girl, that's not my ex, yeah, yeah  
I kept it real and you said you respect that  
Now you actin' all different, callin' me, trippin'  
Thought I told you when we met that
