

## DOWN BAD

Destin Conrad

Heard it's bittersweet on your tongue when you talk about me  
In the same city, can't run from your thoughts about me  
I got eyes all around, so you watch what you say now  
'Fraid it'll make it all the way down  
Wish you would say it to my face now, yeah  
Far from being grounded, don't know who's around, and  
Gassed it up and made you feel like it was bad enough to (Love  
you)  
Hit the dash, yeah  
Testin' on your gangster from your past, yeah  
Know just what to say to make you mad, yeah

Fucked around, now you out there  
Down bad, now you out there  
But did you miss being out there?  
Down bad, now you out there

Is that your new job?  
Riding with your doors on suicide  
You and me split up, that's true divide  
That's what took you out, that's true demise  
If you knew better, do better  
If you choose better, move better  
Just another boy in the city of angels  
If you don't know a thing, all you know is your angles  
All I know is I couldn't deal with the changes  
All I know is I couldn't deal with a stranger  
Pulled up in the rental so I asked where the Range is  
Know you dangerous

Fucked around, now you out there  
Down bad, now you out there  
But did you miss being out there? (But did you miss being out t  
here?)  
Down bad, now you out there  
Fuck around, now you out there  
(Now you out there, now you out there babe, now you out there b  
aby, ohh there)  
(Now you out their baby, oh)
