

Silver Shades

Destinity

You're standing here facing the sea at night
The distant stars provide the only light
Strange flowers grow all around
ethereal beauty beyond human might

Brightening like a frozen relic
Silver shades came to guide your way

You'll never be along again
You'll never die again
See them ! Guardians of life
With the dead ones
Silver shades...

See our smiles drenched in blood and hope
In the reflection of silent mouths

You'll never be along again
You'll never die again

Collect the words, add some gold
and give it back
Accept your faith
there's no place that still remains

It's time for a new beginning held
Silent cries from the bottom of hell

Fading light reveals their call
In the shadows, we rise and fall

You'll never be along again
You'll never die again
See them ! Guardians of life
With the dead ones
Silver shades...
