

Drink

Destroy Boys

Heavens send someone down
I'm about to turn this confession to a smoke cloud
Who put me here it's hard to say
Nails bleed as I claw out of the grave

I want to play guitar
But I reach for a glass
She says that I'm a star
That I won't last

She understands me like you did
She really loves me
I'm a saint living in sin
She really loathes me
She really loves me
She really loves

Sometimes I see the sun rise
I try everything to calm my nervous mind
I don't wanna let go control
Don't like feeling alone

At least I know what I've seen
These horns run through my family
At least I know
At least I know

She understands me like you did
She really loves me
I'm a saint living in sin
She really loathes me
She really loves me
She really loves

Here we are again
She holds me tight
But something isn't right
But something isn't right

She understands me like you did
She really loves me
I'm a saint living in sin
She really loathes me

She understands me like you did
She really loves me
I'm a saint living in sin
She really loathes me
She really loves me
She really loves
