

# Satellites In Motion

Destroy Rebuild Until God Shows

Speak your mind  
Will you stop wasting my time  
Torn in two different directions  
Now the past is coming up on us

I'll watch the world burn through the reflection in your eyes  
Higher in the atmosphere for the lovers it gets lonelier

We wait, we wait, we wait, we wait  
Separated by three arms length  
Like satellites, like satellites  
We drift, we drift, we drift away  
Not meant to be, we 360  
Like satellites, like satellites

Say goodnight  
Maybe we should say goodbye  
Thrown around again in circles  
Wading underneath the sky

Waiting for a sign  
That maybe we should try  
In our bed I only sleep on one side  
I'm on the edge 'til the morning light

I'll watch the world burn through the reflection in your eyes  
Higher in the atmosphere for the lovers it gets lonelier

We wait, we wait, we wait, we wait  
Separated by three arms length  
Like satellites, like satellites  
We drift, we drift, we drift away  
Not meant to be, we 360  
Like satellites, like satellites

(Satellites)  
(Satellites)  
(Now the past is coming up on us)

(Satellites)  
(Satellites)  
(Now the past is coming up on us)

I'll watch the world burn through the reflection in your eyes  
Higher in the atmosphere for the lovers it gets lonelier

We wait, we wait, we wait, we wait  
Separated by three arms length  
Like satellites, like satellites  
We drift, we drift, we drift away  
Not meant to be, we 360  
Like satellites, like satellites
