

# Generation Nevermore

## Destruction

Say goodbye to our mother earth  
The time has come for a rebirth  
A risky deal, the game of fear  
No senseless loss without a tear

Ho much hazard can we take?  
How much harmony can we fake?

True evil is our greed for more growth  
Power-mad rulers love to overdose

How much lies can we bury in blood  
How much more can we twist the word of god?  
Our indifference kills all we adore!  
Wake up - generation nevermore  
We won't stop till our world is in flames  
When did we start reaching out for wrong aims?  
Our indifference kills all we adore!  
Wake up - generation nevermore!

Generation nevermore  
Generation nevermore

The law of the jungle regulates our habitat  
The benefits the ruthless human-rat  
Only the mortal breed is stupid enough  
To not get that their world's a big bluff

When will we stop to violate our globe?  
When will we realize there's no more hope?

We ignore the facts and pray for salvation  
The creator wipes out his own creation!

How much lies can we bury in blood  
How much more can we twist the word of god?  
Our indifference kills all we adore!  
Wake up - generation nevermore  
We won't stop till our world is in flames  
When did we start reaching out for wrong aims?  
Our indifference kills all we adore!  
Wake up - generation nevermore!

Generation nevermore  
Generation nevermore

How much lies can we bury in blood  
How much more can we twist the word of god?  
Our indifference kills all we adore!  
Wake up - generation nevermore  
We won't stop till our world is in flames  
When did we start reaching out for wrong aims?  
Our indifference kills all we adore!  
Wake up - generation nevermore!

How much lies can we bury in blood  
How much more can we twist the word of god?

Our indifference kills all we adore!  
Wake up - generation nevermore  
We won't stop till our world is in flames  
When did we start reaching out for wrong aims?  
Our indifference kills all we adore!  
Wake up - generation nevermore!

Wake up - generation nevermore!
