

Are you gonna make me breathe?
Are you gonna make me breathe?
Are you gonna make me breathe?

I ain't no stripper, but you're making me wanna strip
Ain't no beginner, but you make me feel like it's my first trip
So give me back the feeling only you can bring me
Away from all the lights of the floor
Way above the ceiling this night's what you make it
So wanna pass out
We bout to spark it up-up-up

And if I take it way too far tonight
Out of control, lost in the light
Before everything fades to black...
Put your lips on me and breathe
Are you gonna make me breathe?

I'm gonna get ya, gonna gonna make you fall in love
Take a hold of my body, tell me what you're dreaming of
Give me back the feeling only you can bring me
Away from all the lights of the floor
Way above the ceiling this night's what you make it
So wanna pass out
We bout to spark it up-up-up

And if I take it way too far tonight
Out of control, lost in the light
Before everything fades to black...
Put your lips on me and breathe
You just gotta help me breathe
Are you gonna make me breathe?
Are you gonna make me breathe?

I see you standing there
Why are you just standing there?
Better come over here
I need you right now

This is the night the sun came up
Right here, right now

You just gotta help me breathe
Are you gonna make me breathe?
You just gotta help me breathe
