

## Keep Away from Me

DevilDriver

So sick of all the sorrow  
Put down all my dreams 'til tomorrow  
Watched you slowly slip away  
While I try to live my life without you  
Let these thoughts and words rip out the sutures  
Let this light burn my way, into the future

Whatever you do  
Just do it away from me  
Whoever you want to be  
Just be it away from me  
Wherever you go  
Just go there away from me  
Whoever you are now  
Just stay clear away from me

These shackles that hold us all here  
This burden so heavy it's not clear  
Look into your eyes, it's just a vacant stare  
Looking back I can tell you never cared

Whatever you do  
Just do it away from me  
Whoever you want to be  
Just be it away from me  
Wherever you go  
Just go there away from me  
Whoever you are now  
Just stay clear away from me

The reluctant and broken road  
Beaten down and bruised  
Deaf, dumb and blind  
From all the endless abuse

Whatever you do  
Just do it away from me  
Whoever you want to be  
Just be it away from me  
Wherever you go  
Just go there away from me  
Whoever you are now  
Just stay clear away  
Just stay clear away from me
