

Take your shot with your bullshit speech
I'll let the darkness fill the peace
Break these bones, rip out my veins
Let hatred bring me back again

I have an army and their voices are loud
I have an army and they'll, tear you down

Tear the skin, telling lies that you don't know
Speak those words and watch my army grow

I have an army and their voices are loud
I have an army and they'll, tear you down

Bury me
Drown me in your chemicals
Like a vine that grows
Or a seed first sown
I will rise again
Watch my army descend

Take a shot, yes your speech is free
But not your negativity
Break this girl, she'll feel the pain
Let hatred bring me back again

I have an army and their voices are loud
I have an army and they'll, tear you down

Bury me
Drown me in your chemicals
Like a vine that grows
Or a seed first sown
I will rise again
Watch my army
Watch my army descend

Oooh, ooh, ooh, ooh

I have an army and their voices are loud
I have an army and they'll, tear you down

Bury me, bury me, bury me
Drown me in your chemicals
Like a vine that grows
Or a seed first sown
I will rise again
Watch my army
Watch my army descend

I have an army and they'll, take you down
