

God Eater

Devilyn

Very middle of desert snowy ground
Human children alone
With the purity of snow and fright
Modeling the snowmen

In giving them their names
One opposing another
The signs appeared in the skies
And started the red rain

God eater Your good lords made me unfaithful
I shall devour ludicrous idols of yours
And make you equal before the truth of death

No more scraps of meat at wood
No leper rivers rites
No taking the sun and the moon down
No black goats, no white lambs
Just one hungry wolf

God eater
No more them all
Eat my fill now
