

Summer

Devin Townsend

Arms around the world
Wanting to be seen
Through all the words and prose we're all just easily deceived

Fear is overworked
We walk each other home
Time may occupy your minds but all they are alone

If you're counting waves, you're coming down
If you're counting waves, you're coming down
If you're counting waves, you're coming down
If you're counting waves, you're coming down
Head to the ground

Time to go
We both know
Time is saved

All is frozen hard
Fall in love with creatures watch the ego tear apart

'Cause I'll be on the sky
I'll be on the stars
Time may occupy us but we're only who we are

If you're counting waves, you're coming down
If you're counting waves, you're coming down
If you're counting waves, you're coming down
If you're counting waves, you're coming down
To the ground
To the ground
To the ground

Time to go
We both know
Time is saved
I am saved now
