Devlin

Oh shit, is it my go?  
I'll just let everyone spit when I lie low  
Then strike when the time feels right  
Self instructed, fuck your advice  
I don't want much but a slut for a wife  
Money in the bank piled up would be nice  
We're all after a luxury life but the ugliest sights are corrupting our mind  
s  
Until your brain can't think for itself, it's just driven by the rage inside  
Best not slip like a baby on ice  
Some man are sharp to react like Arabian knights  
I'm at a stage in my life  
Where I don't care for the hype  
I just wanna better my career  
If you've got a vendetta though, I'm here  
We can make arrangements right  
No snake, I'm a crane in flight  
The dangerous heights  
Painting a page like Damien Rice  
When it's late and I'm high  
Tryna bring the painting to life  
Like my boy Rawz Artilla, I can do what I want, I can say what I like  
I can make dead ravens fly  
In the jaded sky when I spray these rhymes  
I got pointed a gun at my lyrics  
Clicked on the trigger then I waved goodbye  
I'll put the bar in the sky  
I ain't alive, and dead men don't die  
Tell them all that it's Devlinstein  
Infecting minds 'til they're F'd like mine  
When I'm in effect I'm electric  
I'm like Jay Fox, I'm electrolive  
But there ain't no Spiderman  
They try to defy the plan, I'm insighting this fiery land there's no hiding  
here  
Come and find me right where I stand  
No budging, faking, bluffing, all I can do is play with a hand  
I was given in a place called Britain, where the sun don't shine when the ra  
in comes down  
I ain't no liar  
Doggzy and Siah  
All the first man in grime are the fire  
That make me feel like taking a wire  
I'm wrapping it around your neck when I step  
Dev's the messiah  
Hybrid fire  
Cloning my genes with the genie of hire  
Understand I'm gonna wreck this set  
I bite, I don't bark, get a tetanus check  
Whoever you select or dissect in so many sets when I send these threats  
I'll treble any bet that you've set  
Wait until my lyrics start taking effect  
Breaking the spirit of the jaded  
Backslash faded, and new-comers with the rep  
Cause I'm watching, so watch it  
I'm clocking every god damn step  
Mic check, if you wanna be in set well stiffen up your Exoskeletons

Insects wanna creep and crawl around me because they heard that I'm Devlin  
In jest I should slaughter you all and then bury 'em for acting feminine  
Contest, and I'm making you subject one in my strange experiment  
Malevolent, pain indefinite  
Dark development, drug nah I'm resident  
Periodic when I store every element  
You'll never know what's in store for your regiment  
J don't give an F to the K  
I know you see the inside of the presidents  
Brains sprayed by the great  
Country that we gave birth to that buried them  
I've never been credited fully, I know  
That's why I've gotta play this bully-ish role  
You don't wanna fuck with me, I look nice, but I'm not like the Annabelle dolls, you know  
Devlin is going on cold, you know  
This is the OT show, you know  
I ain't never sold my soul, you know  
Devlin is ruthless, like a house in a hurricane, quick here I come again  
Well equipped for this shit when I run away  
When my tongue get burnt like a ginge on a sunny day  
Don't care what he'd fucking say  
Telling me I'm nothing great, you muppet wait, I'm big like Puffy's mate  
I'll put your name in a letter and I'll seal your fate  
I maintain no pain, no gain  
Youngest veteran inside this game  
I've earned my stripes, burnt these mics  
I inspired these kids when I came  
OT to the days of the movement  
Major improvement making a change  
My name's not a drug, don't use it  
It just might ruin your day (Ruin your day, ruin your day..)
