

Triton

Devlin

Who when where and what I'll scare em off
Some fairy mob
Trying to be what they're clearly not
Wanna breath or dare to cough
Your getting beat with my slipper when I'm taking it off
Grandad of grime man
Bag full of lime when I turn up
Your in the Nile with a Croc in
My dominion I tried to incite more brilliance
I weren't just rhyming a lot
Visionary with an urban dictionary
Running rings round those that I come across
Grinding for lots no less to be lost but a guy that will seek always gets wh
at he wants
Looking up at a policeman's weapon
Not quite but guys seem under the cosh
If I come back I wanna be a Leopard
Why cause I've heard they don't change their spots
I just want a little normality reality is not that real I need clarity
If not then a chariot to carry me pulled by forces polar to gravity
They have not got what I have in me
More grit than a snow truck avidly
Rolling up with the blown vocabulary
Way before Shaun T and I insanity
I had to work it out
And kept it more real than the Bernabeu
Get slapped on sight in your dirty mouth taken out of the game that I turned
around
The pots been boiling now for too long one chef with a firmer hand
Is back now out of the back ground so back down or else get boiled not blanc
hed

Let me take it back then
The station's Deja
The dj's Mac 10
The producer's Lewi White and man are murking his latest anthem
Mission kill all the basic man dem
These words came with actions
Don't speak if it ain't been sanctioned
Gh Lewi and Devs
Do you know what I'd be doing instead
Kicking down doors and ruining creps
Licking off shots in Newham with Wes
One man I ain't in a gang
I don't care if it's blue if it's red
Mike Tyson I'll chew off his head
Cheddar Bob he nearly blew off his leg
Put that away
I said put that away before the feds put man away
Foot on the break
I said foot on the break before we crash look at the gate
Knife in my hand
I said knife in my hand it's a rasclart pussy buffet,... and I'm going to eat
some pussy today
I see no ceilings
This flows giving em a reload feeling
Bullet in your head leave your ego bleeding

I need no reason I pull up bike like
I be in Paid In Full and it's the scene where Rico's squeezing
I'm at the age where I'm losing people to natural causes
Guns are the least of my worries my nigga's on chemo treatment
G h, e double t, o season
Dope boy flow like I'm kilo dealing
They never let me in I was outside in the cold one eye through the keyhole p
eeeping
T t l c we no creeping
Action zero speaking check out the banger that we roll deep in

You want gas
I'll burp on the mic
You want bars
Me and Ghetts will be here for the night
You want style
Well just watch when I strike
Think your wild
You'll get a left then a right, alright
It's Jim from the block not Jenny
Running up on any when I back this Henny
See me on telly or the Heathway ready
For a long night hold tight get ready
Running this game white Uriah reddie
And when I've got the fire in my belly it will not be sweet
Like ice cream or jelly
I'm shelling in here it's like led confetti
You wanna check yourself like Burberry
It's a witch hunt when I come and burn many
Cremation is imminent start vacating your citizens
By train or the ferry
Planes whatever change in the weather
I'm bringing a monsoon full of misery
I'm bringing the most food for you lyrically
I'm bringing you more nukes than the militarily
When I drop em all, it's unstoppable
You try stop it it's highly improbable
Blind logic, sight of an Oracle
And I can see more shit for me
But I'll deal with it life's hard get real with it and I might seem dead but
I'm still here living
Still here giving
All that I've got, while they've got a mouthful of balls and cock
Breeding it, whenever an mc's hot's just egging me on you better tempt me no
t
I ain't got to scream on the mic and pretend that I like everybody just to g
et a response
It's nice I can do what I like
I've been on the grind ever since me and Mikey dropped, a cd from that grime
y block and met Col then Dal then the Island boss
