

For the longest time  
I planted my flowers in gasoline  
This world made a cynic out of me  
Must've lost my mind  
From all those nights watching bad TV  
But then you pulled up on the scene

You should see you in this light  
I think I must've loved you in a past life  
Baby, let's see what comes of a night drive  
Because  
You make me feel alive...

For the longest time  
Been travelling through an eternity  
Like nothing was meant for me  
How you ease my mind  
I can't explain  
But I won't ever be the same

Ooh, the way you look tonight  
How did you manage to do everything right?  
I've been waiting baby, it's about time  
Uh, huh  
You make me feel alive...

You make me wanna ditch my obligations  
Cancel all my reservations  
Break out the boots that I've been saving for an occasion  
All my life I've been so jaded  
Maybe it's not so complicated  
When you're so divine  
You make me feel alive...

You should see you in this light  
I think I must've loved you in a past life  
(You make me feel...)  
You should see you in this light  
I think I must've loved you in a past life  
(You make me feel...)
