

Into The Night

Devour The Day

Come and take me, come and take me over the edge
A signal breaking the silence
To lead me home again
Into the night

Separate me
Let me trip in the space
And recreate me
Rewire the brain
A wholesome place and pull me in to face

Liberate me
The mind, body and soul
That it escape me
Take away the control
Rewrite the rule
Grace will make me whole

Open the circuits and I'll make a machine
A spark behind the iris
A bloom inside the seed
That's where I belong

Into the night, come and take me
Come and take me over the edge
A signal breaking the silence
To make me whole again
Into the night

Elevate me
Growing out of the dirt
I see the real me
A spec on the earth
There's no words, the one I don't deserve

Kill the curses
All the credit I need
A spark behind the iris
A bloom inside the seed
That's where I belong

Into the night, come and take me
Come and take me over the edge
A signal breaking the silence
To lead me home again
Into the night
Come and take me, come and take me over the edge
Voice that shatters the silence
That brings me home again
Into the night

Into the night, come and take me
Come and take me over the edge
A signal breaking the silence
To make me whole again
I am alive
Come and find my signal

Let it take me, take me over the edge
Into the night
