

# Lightning In The Sky

## Devour The Day

It was a dangerous display  
A beautiful storm  
A flash in the atmosphere  
And then you were gone  
A deadly device  
Your electric embrace  
Surrounded and swallowed me alive  
Now I'm not the same

Strike me down before you burn away  
Nothing that can save me  
I'm so strung out on the static in my veins  
Even when it all comes crashing to the ground  
Will you still get me high  
Strike me down before you burn away  
Like lightning in the sky (lightning in the sky)  
Like lightning in the sky (lightning in the sky)

You are a violent design  
A perfect attack  
A flawless moment in time  
I'll never get back  
The friction you make  
The release you create  
You are my one and only way  
My way of escape

Strike me down before you burn away

Nothing that can save me  
I'm so strung out on the static in my veins  
Even when it all comes crashing to the ground  
Will you still get me high  
Strike me down before you burn away  
Like lightning in the sky (lightning in the sky)  
Like lightning in the sky (lightning in the sky)

Strike me down before you burn away  
Nothing that can save me  
I'm so strung out on the static in my veins  
Even when it all comes crashing to the ground  
Will you still get me high  
Strike me down before you burn away  
Like lightning in the sky (lightning in the sky)  
Like lightning in the sky (lightning in the sky)

Like lightning in the sky  
Like lightning in the sky  
Like lightning in the sky  
Like lightning in the sky
