

Narcissistic Paraphilia

Devourment

Rooted deep within my psyche dwells another being - incurable and unrepentant in its isolation
Kill me now before I kill another motherfucker dead

Disconnected socially - abnormal genetic psychopathy
Cold-blooded homicidal fixation
At home they know not of what I have become

Driven to kill by predation
Schizophrenic profanation

Motivated simply by self-gratification
My grisly practices remain undetected

Death by torture, my only salvation
To slowly die in pain must be the greatest gift of all

False perception through psychosis

There are many more like me - products of society
Hiding in plain sight as we walk among you

We are your sons, brothers, husbands, friends and fathers
Ordinary men by day - concealing offal secrets.
Meticulously devising plans to murder
Littering the woods and riversides with human detritus

Homicidal ideation - abductions through seduction
Gashes to ashes, dust to fucking dust

Dumping bodies, one by one
The stench of death permeates the air we breathe
Strangulations and dismemberments
Eternal mask of sanity
