

Narcotics

Devvon Terrell

Me and my ex were toxic
We were sick as shit
That's why we stayed up under covers
So bed ridden yea
Shit was so contagious that my momma knew
She looked at me like who are you
Get away from me yea
Now back to this bed that we living on
It's the only place that we can get along
Can't call the homies to chill with us
It take a lot to deal with us
So they just leave us alone the shit was crazy

But when we get alone and its just you and me in this bed
People ringing our phone and probably thinking we dead
I should've died man that shit was chronic
That shit hit harder than narcotics me and my ex were toxic

Roll up
Let's drink
Roll up
Drink
I need to change, need to change (Roll up)
But you just in the way (Let's drink)
Why do I like the pain (Roll up)
Because it feels great (Drink)

You ever been so gassed that you don't know what day it is
Calling out of work and suppose to work a double shift
But I'm so caught up with this person I don't see the shit
But I can't lie the shit was fire tho
And that's what makes it toxic for me
It be so good that you would risk it all
You don't even realize you fall when you not standing up
You a fucking drug
Cold sweats every night in this bitch
I'm reminiscing like

When we get alone and its just you and me in this bed
People ringing our phone and probably thinking we dead
I should've died man that shit was chronic
That shit hit harder than narcotics me and my ex were toxic

Roll up
Let's drink
Roll up
Drink
I need to change, need to change (Roll up)
But you just in the way (Let's drink)
Why do I like the pain (Roll up)
Because it feels great (Drink)

I need to change my ways
But you just in the way
You always wanna play
Shit I need to change need to change
But you just in the way

Why do I like the pain
Because it feels great
Feels great
