

## Color

DI-RECT

What's the color  
Of your grief?  
I bet it's cool grey  
Or maybe acid green  
Both our shadows  
Never sleep

Well, is there no solution?  
I'm sick of the all the pain  
Shapeless pictures  
And nothing else remains  
We scream and suffer  
Howlin' wolf, yeah

We can go on and grow apart  
And all is finished  
Or maybe we can try and find  
The common ground from where we started  
Why do we try to deny what we're seein'?  
How come we're gettin' torn apart?  
We can go forward, move  
And forge a new beginning  
And I won't hesitate

Now tell me, what's your poison?  
I know it's nothin' neat  
It's like an ice-cold breakup  
Was it all just make-believe?  
You and I, we love each other  
We're like the sun and moon  
(We're like the sun and moon)

We can go on and grow apart  
And all is finished  
Or maybe we can try and find  
The common ground from where we started  
Why do we try to deny what we're seein'?  
How come we're gettin' torn apart?  
We can go forward, move  
And forge a new beginning  
And I won't hesitate  
And I won't hesitate

Why do we try to deny what we're seein'?  
How come we're gettin' torn apart?  
We can go forward, move  
And forge a new beginning  
And I won't hesitate  
And I won't hesitate  
And I won't hesitate
