

Nightcrawler

DI-RECT

Are you chasing the dragon
Or is it chasing you?
Is your skin on fire
Are your lips turning blue?
Beware of the bedbugs
When it starts to itch
They know what you're hiding

Don't we all need a fix?
We all need a fix

All I got is you
All I want is to survive
Just gotta know how
To open my eyes
I got to make it through the night

Everyone has given up
But there's a needle in the haystack
When the flames are too high
No one knows the way back
What are you running for?
President of the bando?
They know why you're lying

And don't we all need a fix

All I got is you
All I want is to survive
Just gotta know how
All I gotta do
All I gotta do is try
To open my eyes
It's all in my mind
I got to make it through the night

All I got is you
All I want is to survive
Just gotta know how
All I gotta do
All I gotta do is try
To open my eyes
It's all in my mind
I got to make it through the night
I got to make it through the night
