

# No Goodbye

DI-RECT

Let's talk till the morning comes, the stars are long gone  
This place is still asleep but we're too busy dreaming  
Rewind our favorite songs, light up the last crumbs  
I'll leave it all behind, but I'll never say goodbye

Golden opportunities and flashy trophies  
How could I settle for less when there's so much more?  
Big streets, bright lights, hypnotize me  
Small hopes and silent cries, are still inside

A different view just a few miles away  
And the sun is already down  
Kissed every face and it's sweet till they fade  
'Cause I'll be leaving tonight  
We'll never say goodbye

Wide-eyed unicorn, riding that high till the break of dawn  
I keep swaying at every turn, I still got a lot to learn  
Five tries or a little bit more, when the wind falls  
I'll come down and hit the ground, wake me up, I'll never say goodbye

Where is home? Where I needed to be  
Touch my heart and ask myself  
What is it telling me?  
What is it telling me?  
What does it tell me?

I'll be gone with the speed of light  
Can I go any faster?  
I'm leaving tonight  
But I'll never say goodbye  
I'll never say  
I'll never say goodbye

But I'll never say goodbye  
I'll never say goodbye
