Reach

DI-RECT

It's not like before

A love I've been asked to kill
What can I do
All of me screams to keep it
Why do I try
Feelings for you are still so strong
You turn your head
Can I move a little close behind you

So much to say
But not enough words to make it right
Look in my heart
What's there is not meant to hurt you
What can you do?
When all that you know tells you it's wrong
Open your mind
Can you get a little close behind me?

Hey
A little trust is all it takes
We gotta let our love grow
And find a way to make this home, our home.

It's not like before
A love we don't need to kill
What can we do
Know that you'll never lose me
Give it a chance
This isn't wrong, we make it right
Don't turn your head
Why can people never dream together

Hey
A little trust is all it takes
We gotta let our love grow
And find a way to make this home, our home.
We're only happy when we're sad
We gotta let our love grow
And find a way to make this home, our home.
