DI-RECT

Like a big bang baby
It'll turn your world inside out
I am a supernova
So come on and turn the light out
It'll be over soon

Try to telescope me
I'm about to blow your mind, girl
I am a cosmic cowboy
Try to get to close, you'll find out
I'll be beyond the moon
Look up and see me now
Can't shoot me down

You keep on movin'
Spinning on the dance floor
You're never gonna stop
Never get tired, oh
When you're in love with a rockstar
You're in love with a rockstar

You keep on movin'
Spinning on the dance floor
You're never gonna stop
Never get tired, oh
When you're in love with a rockstar
You're in love with a rockstar

I am a king called chaos
I will open up a black hole
Like a double asteroid
Feel the gravity between us
It'll be over soon

Like a big bang baby
Looking for a new beginning
I'll be beyond the moon
Look up and see me now
Can't shoot me down

You keep on movin'
Spinning on the dance floor
You're never gonna stop
Never get tired, oh
When you're in love with a rockstar
You're in love with a rockstar

You keep on movin'
Spinning on the dance floor
You're never gonna stop
Never get tired, oh
When you're in love with a rockstar
You're in love with a rockstar
You're in love
You're in love
You're in love with a rockstar

Watch out!
Look up!
I'm comin' down!
(With a rockstar, when you're in love with a rockstar)
Miles and miles away
You're in love with a rockstar

You keep on movin'
Spinning on the dance floor
You're never gonna stop
Never get tired, oh
When you're in love with a rockstar
You're in love with a rockstar
You're in love
You're in love
You're in love with a rockstar
