

## Wouldn't Understand It

DI-RECT

Take me back to that dazzling sundown  
We shared our first kiss without a sound  
Our lips locked and we loved in secret  
Ooh, lately, I miss the way that we unwound  
Problems were places to play around  
We'd forget the things that we regret

And we cast the longest shadow in the streetlight  
With you by my side, I felt so alive

I remember every song  
Waited for the sun to come  
Danced all night  
You wouldn't understand it  
So in love with everyone  
We saw the moon become the sun  
You wouldn't understand it

Bring me back to that passionate wildlife  
Our joy was unwilling to compromise  
No one could touch what was sacred  
Swing me high in the air, we were childlike  
Thoughts of the future were sacrificed  
Each moment we touched was untainted

I remember every song  
Waited for the sun to come  
Danced all night  
You wouldn't understand it  
So in love with everyone  
We saw the moon become the sun  
You wouldn't understand it

I remember every song  
Waited for the sun to come  
Danced all night  
You wouldn't understand it  
So in love with everyone  
We saw the moon become the sun  
You wouldn't understand it
