

Spark

Dia Frampton

You were always there waiting for me
Under the stars when I couldn't breathe
You never let me go, said, "I'll be there for you"
And at my deepest lows, you still pulled me through

And when I needed you, when my whole world was falling apart
You came running to lift me back up inside your arms
And you say, "It'll be OK. Take my hand, take me somewhere safe
"

When I needed you, when I was lost out in the dark
You were my spark
You were my spark

You were my spark

I'm on the edge, I try to escape
Out of my head and out of the haze
You never let me go, said, "I'll be there for you"
And at my deepest lows, you still pulled me through

And when I needed you, when my whole world was falling apart
You came running to lift me back up inside your arms
And you say, "It'll be OK. Take my hand, take me somewhere safe
"

When I needed you, when I was lost out in the dark
You were my spark
You were my spark
You were my spark
You were my spark

You were my spark
