Impossible

Diamante

Freeze for a moment, just a single moment
Tell me, baby, tell me how does it feel (feel)
To know I'll always fall?
Remember the night I told you I loved you?
Remember the night I told you we'd make it?
Little did we know

That we'd laugh out loud
Come on, won't you look at us now?
Isn't funny how life works out?
You were my best mistake

I thought loving you was impossible
You drive me insane but I just can't stay away, no

You are so dysfunctional but I can't help but want it
Every single little flaw is what makes you so damn impossible

What does it matter if we're on a path to a broken heart?
It's a risk that I'll take, yeah
All that I know is I don't know at all

Whoa! So we'll laugh out loud
Come on, won't you look at us now?
Isn't it funny how life works out?
You are my best mistake

I throught loving you was impossible
You drive me insane but I just can't stay away, no

You are so dysfunctional but I can't help but want it
Every single little flaw is what makes you so damn impossible

You're so vain the kinda guy I'll never change
And it's messed up, too I'm caught up in you
I'm so lost wouldn't trade you for any cost
And it's crazy, too hell, I was meant for you

I throught loving you was impossible
You drive me insane but I just can't stay away, no

You are so dysfunctional but I can't help but want it, baby
Every single little flaw (every slittle flaw)
Is what makes you so dawn impossible
