

Time it can slide
Like a riddle through your mind
But time tells me that
You're not happy

I hope you make it hope
When your oxygen gets low
'Cause you're never that far
When you know who you are

Don't dig it up
You're never gonna fill the hole
You got what you want
Buried there in you soul
Don't dig it up
Oh no

It's hard to get back
When the vision fades to black
And the stars that you see
Don't shine brightly

Forget what we've learned
Let your mighty icons burn
'Cause we're never that far
When we know who we are

Don't dig it up
You're never gonna fill the hole
You got what you want
Buried there in you soul
Don't dig it up
Oh no

You never gonna find what's inside
You're gonna have to find, what's inside
Oh yeah

Don't dig it up
You're never gonna fill the hole
You got what you want
Buried there in you soul
So many times
I've seen you looking for the bones
Don't dig it up
Oh no
