

# Kindness For Weakness

Digga D

(M1OnTheBeat)

You know what comes behind havin' that chain  
So when I see you shoutin' out the opps, I find that lame  
And the worst thing is that they don't rate you the same  
See them all on Insta' Live talkin' down on your name  
But, I came out the cage, like, "Why they chattin' on \*\*\*\*?"  
When it's me that's been goin' there and slappin' the gauge  
You're the same one that told me you ain't fuckin' with \*\*\*\*  
Now, you're friends again, all you rap niggas are fake  
Look, I fell out with a lot of people 'cause of \*\*\*\*  
Just because I'm beefin' him, that don't mean you're cool with us  
He apologised to \*\*\*\*, I held my head in disgust  
Everyone I beef links up, it's terrible, cuz  
Stormzy the G.O.A.T, I'm tryna be on that tape  
But I can't, you got some niggas on that tape that's fake  
I questioned myself, like, "Have I made a mistake?"  
Should I listen to these people when they tell me to change?  
Stay strong, stand my ground, and I remain the same  
Think I'm the only one that done that when they got some fame  
When you let shit slide, niggas think they can skate  
He thought he was on time, and, now, they're callin' him late (Uh, look)

Niggas take my kindness for weakness  
I see their weakness, but they're showin' me in kindness  
No backbone, niggas spineless  
When shit's goin' left, I see these niggas ain't righteous  
Niggas take my kindness for weakness

No backbone, niggas spineless  
When shit's goin' left, I see these niggas ain't righteous

I been in the streets (I been in the streets)  
I don't fuck with these neeks (I don't fuck with these neeks)  
I'm knees deep in this beef (Knees deep in this beef)  
They said they're onto Rhys, fuck peace, we got beams  
Nigga, I ain't losin' sleep  
Fuck beggin' for a seat, I'ma build my own table  
I believe in myself, I know I'm able  
When no one had faith in me, I prayed and stayed faithful  
I learned how to D.I.Y. when niggas weren't able  
I been in the streets (I been in the streets)
