

In Flames

Digital Daggers

Keep your confessions
Cause babe I'm no saint
We're playing with fire
But I like this game
And I know your devils
I know them by name
When you look my way
Oh I'm not afraid

With your kiss on my skin
And this mess that we're in

In flames
We're going down, we're going down, we're going down
In flames
We're going down, we're going down, we're going down
In flames
We're going down, we're going down, we're going down
In flames
We're going down, we're going down, we're going down

Love be my villain
We're one and the same
Got a heart full of bullets
Cause we got good aim
Come lay down beside me
Be savaged and tamed
You boil in my veins
We won't ever change

With your kiss on my skin
And this mess that we're in

In flames
We're going down, we're going down, we're going down
In flames
We're going down, we're going down, we're going down
In flames
We're going down, we're going down, we're going down
In flames
We're going down, we're going down, we're going down

We'll rise from the ashes and do it again
We'll rise from the ashes and do it again
We'll rise from the ashes and do it again
And do it again, and do it again

In flames
We're going down, we're going down, we're going down
In flames
We're going down, we're going down, we're going down
In flames
We're going down, we're going down, we're going down
In flames
We're going down, we're going down, we're going down

We'll rise from the ashes and do it again

We'll rise from the ashes and do it again
We'll rise from the ashes and do it again
And do it again, and do it again
