

Second Chance

Digitalism

We can't keep telling ourselves it's invisible
The truth's right there in your eyes
Could feel my spirit explode like a mirror ball
Lost in tunnels of light
We should have just crossed our paths
We knew it on the first day
We could have had all this time
We wasted it on a mistake
We get a second chance tonight
We get a clean slate
Forget about the past tonight
It's never too late
I'm here to do whatever it takes
I should have been honest about what you do to me
Was too caught up in my pride
But we can't get lost in those missed opportunities
Let's bring this into the light
We should have just crossed our paths
We knew it on the first day
We could have had all this time
We wasted it on a mistake
Let's bring this into the light
We get a second chance tonight
We get a clean slate
Forget about the past tonight
It's never too late
I'm here to do whatever it takes
