

Body Talk (Mammoth)

Dimitri Vegas & Like Mike

Everyone's a lonely lullaby
Looking for a voice to amplify
All the devil's dust and heat inside
To a stadium of alibis

And I, I wanna feel you
And read between your lines
And I, can never heal you
But I promise I could try

Let me drink you heart drunk
Let me dream your eyes shut
Let me get your mind off
Let me make your body talk
Let me drink you heart drunk
Let me dream your eyes shut
Let me get your mind off
Let me make your body talk

I wanna feel you
Let me make your body talk
I could never heal you
Let me make your body talk

I wanna feel you
I could never heal you
Let me make your body talk

I been watching you in marathons
Every episode cliff-hanging on
Cause you're a queen who's never crowned upon
And I count your fear is overdrawn

And I, I wanna feel you
And read between your lines
And I, can never heal you
But I promise I could try

Let me drink you heart drunk
Let me dream your eyes shut
Let me get your mind off
Let me make your body talk
Let me drink you heart drunk
Let me dream your eyes shut
Let me get your mind off
Let me make your body talk

I wanna feel you
Let me make your body talk
I could never heal you
Let me make your body talk

I wanna feel you
I could never heal you
Let me make your body talk
