

After The Dance

Dion

You take my hand Song starts to play Softly you hold me Slowly
we sway You whisper sweet words of love And I drift away

I feel like I'm falling, under a spell Whatever you do, you sur
e do it well I wanna let go, but I need to know where I stand

After the dance is done And the moment is gone And the music is
faded away Will I still be the one After the dance After the d
ance is done

We walk together, into the night A sliver of moon, is just enou
gh light You look at me, I could get lost in your eyes You say
it's love, maybe it's true And it would be easy, to give into y
ou But as much as I want you, That's how much I want to be sure

After the dance is done And the moment is gone And the music is
faded away Will I still be the one After the dance After the d
ance is done

As much as I want you, That's how much I want to be sure

After the dance is done And the moment is gone And the music is
faded away Will I still be the one After the dance After the d
ance is done

After the dance is done After the dance is done
