

Can't Unlove You

Dionne Bromfield

Messed myself up and I knew from the start
How could we work when it's already apart

All the little things you said
Embedded in my head
Round and round thinking it's true
Got hooked on you boy
Even though there we couldn't go through, oh

I can't make myself unlove you
I can't make myself untouch you
Can't still feel your skin and the taste of your lips
Can't unbreak my heart and the pain that's within
I just can't make myself unlove you

Try to hold back all the love I grew
But what good is that when my heart lays with you
But we both have other lives and know that it ain't right
I'd do it all over again
And when we speak after dark
It's like we're heart to heart
But that don't mean that it ain't true

I just can't myself unlove you
I just can't myself untouch you
Can't still feel your skin and the taste of your lips
Can't unbreak my heart and the pain that's within

Guess I gotta thank you for the memories you gave me boy
Truth is that we really need to leave the past and move right on
Now I know that we can never be together
All I can do is try to walk away

But I can't make myself unlove you
I just can't make myself untouch you, yeah
Can't still feel your skin and the taste of your lips
Can't unbreak my heart and the pain within
I just can't make myself untouch you
I just can't make myself unlove you
Oh
