

I Don't Need Another Love

Dionne Warwick

I don't need, I don't need another lover
No, I don't need, I don't need another lover, no, no, no
Well, it's alright (WARWICK: Yeah, yeah)
Ummmmmm-ummmmmmmmm, yeah
Tell me how you feel, Baby
WARWICK: I feel good about you
I don't need another lover, no, no, no
SOLO SPINNER: Woo-ooo-ooo-yeahhh Baby,
just let me tell you this
BOTH: I'm satisfied in my heart
No looking back
I knew right from the start
I was on the right track
I searched for so long
For the right one
You know that I found
No greater love under the Sun
Oh yeah, others may come
And other lovers may go
ALL: I don't need another love to call my own
And make sweet love to me
I don't need another love to belong
You're the love I need
BOTH: Holding out (SPINNER: Well) for the best
I did the right thing
I knew if I could only pass the test (SPINNER: You did it)
True love it would bring Now we stand (SPINNERS: We stand) so strong
Like an oak tree
One love in a lifetime (SPINNER: Yeah)
That will do it for me
Oh yeah, others may come
And other lovers may go
ALL: I don't need another lover to call my own
And make sweet love to me
I don't need another lover to belong
You're the love I need
BOTH: Woo-ooo-ooo-ooo-ooo-oooo
Don't you know that storm clouds may rise
Strong winds may blow
Others may come
But they'll just have to go
SPINNERS: Don't need another love to call my own, no, no, no
And make sweet love to me (WARWICK: Noooooooooooooh Baby)
I don't need another lover (SPINNER: No, no, no) to belong (WARWICK: No, no,
no)
You're the love I need (SPINNER: I believe your love)
Without you there's no real love
To keep me strong
And love me endlessly
WARWICK: I wanna be your fire
SPINNERS: Let me be your lover
WARWICK: Through the wind and the rain, through the dark of the day
SPINNERS: You're the love I need
SPINNER: I knew if I could just pass the test
SPINNERS: I don't need another lover To call my own
SPINNER: We would have a love affair so much better than the rest, Ooooh, Ba
by

SPINNERS: And make sweet love to me...
